

Sonorex® 43/60 Light

Easy Mass Fire and Noise Barriers

General

The Sonorex® 43/60 barrier was specially developed for use above light partition walls and lowered ceilings in order to improve lengthwise insulation and fire resistance. This development was driven by a growing demand for flexibility of furnishing in combination with stringent requirements in the utility and healthcare sectors.

The unique composition of the Sonorex® 43/60 barrier renders the use of one or more plaster strips in the Bandraster grid unnecessary, provided that the adjoining ceiling is specified as fire class C or better and is locally resistant to higher temperatures. The Sonorex® 43/60 barrier is usable in combination with the wall up to a total height of no less than 4000 mm!

Technical data

Size		
Barrier height	max. 2000 mm*	
Length	1200 mm	
Thickness	66 mm	
Thickness mass foil	2.5 mm	(used on both sides)
Sound insulation	43 dB*	Based on ISO717-1:2013
Fire resistance		
	68 minuten*	
Integrity (E)	E60*	
Thermal isolation (I)	I60*	
Classification	EI60*	
Barrier height	max. 900 mm*	
Total wall height	max. 4000 mm*	(including Sonorex barriere)
Resistance against smoke penetration	76 minuten*	Based on NEN 6075:2011
Smoke permeability	S _m	Based on NEN 6075:2011

Usage

Refer to the Sonorex® assembly advice for information on how to fit the Sonorex® 43/60 barrier. Contact us if you have specific questions about the usage of the Sonorex® 43/60 barrier.

(*) Sonorex® products have been tested in accordance with the standards stated in this datasheet. We recommend that you contact us if you have questions about usability, dimensions and connections.
